

# ACQUE SOTTERRANEE ITALIAN JOURNAL OF GROUNDWATER

**Editors-in-Chief:** Giovanni Pietro Beretta, Rudy Rossetto,  
Francesco La Vigna, Iacopo Borsi, Paolo Cerutti

*Acque Sotterranee - Italian Journal of Groundwater* is one of the oldest European journals dealing with groundwater. The journal deals with the multiple aspects of groundwater resources, from drilling technologies to contamination, groundwater/surface water interaction, hydrogeochemistry, numerical modelling, etc. A special attention is devoted to the Italian regional and socio-economic context, as well as to the Mediterranean countries and more in general to the EU area and its border countries. Its goal is to link together the academic world, professionals, authorities, private and public companies by presenting up-to-date scientific and technical papers.

Submitted papers undergo a double blind review and the Editors-in-Chief guarantee a short-time response on the editorial decision since the date of receipt.
